

Luxury Cruising

Luxury cruising is the best way to see multiple destinations with your suite acting as your home base for each new location.

The story of human history is told where water meets the land. Most major cities and cultural centers were built on the shore so it makes sense to explore these destinations from their heart - the water. Small ship ocean and river cruises offer five-star amenities without isolating visitors from the destination. More often than not, on-shore excursions include exclusive opportunities not available to the average traveler. Imagine private lunches at a presidential palace or a tour through an ancient vineyard complete with tastings and a complimentary bottle. River tours are never about seeing a destination, but rather having the fullness of the experience.

Itineraries

There are hundreds of small ship ocean and river cruises to choose from but we make finding the right one simple. Based on your interests and your needs we can find the perfect cruise for you and curate a personalized itinerary for transportation, private tours, and much more.
